GLOBAL AND PLANETARY CHANGE

Contents Volume 12, 1996

Impact of glaciations on basin evolution: data and models from the Norwegian margin and adjacent areas—Introduction and summary
A. Solheim, F. Riis, A. Elverhøi, J.I. Faleide, L.N. Jensen and S. Cloetingh 1
Late Cenozoic history of the Scandinavian and Barents Sea ice sheets
J. Mangerud, E. Jansen and J.Y. Landvik 11
Topographic control on the dynamics of the Svalbard–Barents Sea Ice Sheet
M.J. Siegert and J.A. Dowdeswell 27
Limits on the areal extent of the Barents Sea ice sheet in Late Weichselian time
K. Lambeck 41
Late Cenozoic evolution of the western Barents Sea–Svalbard continental margin
J.I. Faleide, A. Solheim, A. Fiedler, B.O. Hjelstuen, E.S. Andersen and K. Vanneste 53
Cenozoic sedimentation along the southwestern Barents Sea margin in relation to uplift and erosion of the shelf
A. Fiedler and J.I. Faleide 75
Cenozoic erosion and sediment yield in the drainage area of the Storfjorden Fan
B.O. Hjelstuen, A. Elverhøi and J.I. Faleide 95
Quantification of the Pliocene–Pleistocene erosion of the Barents Sea from present-day bathymetry
E. Rasmussen and W. Fjeldskaar 119
Late Cenozoic depositional history of the western Svalbard continental shelf, controlled by subsidence and climate
A. Solheim, E.S. Andersen, A. Elverhøi and A. Fiedler 135
Cenozoic deposition in the Nansen Basin, a first-order estimate based on present-day bathymetry
E. Vågnes 149
Late Pliocene sand ridges at the western margin of the Barents Sea—do they monitor Late Pliocene glaciations?
S.-M. Knutsen and K.-B. Larsen 159
Late Cenozoic sedimentation and uplift history on the mid-Norwegian continental shelf
S. Henriksen and T.O. Vorren 171
Base Pliocene velocity inversion on the eastern Vøring Margin— causes and implications
P. Reemst, J. Skogseid and B.T. Larsen 201
Rates of erosion and sediment evacuation by glaciers: A review of field data and their implications
B. Hallet, L. Hunter and J. Bogen 213
Sediment flux from a fjord during glacial periods, Isfjorden, Spitsbergen
R.LeB. Hooke and A. Elverhøi 237
Sediment deposition in an iceberg-dominated glacimarine environment, East Greenland: basin fill implications
J.P.M. Syvitski, J.T. Andrews and J.A. Dowdeswell 251
Soil investigations, offshore mid Norway: A case study of glacial influence on geotechnical properties
J. Sættem, L. Rise, K. Rokoengen and T. By 271
Mass movements in glaciomarine sediments on the Barents Sea continental slope
B. Kuvaas and Y. Kristoffersen 287
The Middle and Late Pleistocene evolution of the Bear Island Trough Mouth Fan
J.S. Laberg and T.O. Vorren 309
Quantification of Cenozoic vertical movements of Scandinavia by correlation of morphological surfaces with offshore data
F. Riis 331
Cenozoic uplift of Fennoscandia inferred from a study of the mid-Norwegian margin
L.M. Stuevold and O. Eldholm 359
Possible consequences of glacially induced groundwater flow
C.F. Forsberg 387

The impact of glaciation on the groundwater regime of Northwest Europe
G.S. Boulton, P.E. Caban, K. van Gijssel, A. Leijnse, M. Punkari and F.H.A. van Weert 397
The impact of late Cenozoic uplift and erosion on hydrocarbon exploration: offshore Norway and some other uplifted basins
A.G. Doré and L.N. Jensen 415
The influence of glaciation on the basin temperature regime
H. Johansen, W. Fjeldskaar and J. Mykkeltveit 437
